1	Examination Lamp LED Trolley Mounted	<p><b>Features :</b></p> <p><b>Moveble with articulated arm version</b>                      Innovative illumination system                      based on LED Technology (Light Emitting Diodes)</p> <p><b>• Cold Light</b>                      This cold light will not alter or change the target temperature                      on the surgical field or on the surgeons head.</p> <p><b>• White Light</b>                      The new LED technology it produces an unparalleled quality of light.                      The Light Colour Temperature (CCT) is 4.900 °K as sun light</p> <p><b>• Efficiency</b>                      LED have a very linear yield and negligible                      performance decay for their life duration.</p> <p><b>• Long Life</b>                      LEDs are semi conductors.</p> <p><b>Technical Specifications :</b></p> <p>- Max. light power : 60.000 lux @ 50 cm                      - Ligth adjustment : 0 - 60.000 Lux                      - Light field diameter (d50) : 9 cm @ 50 cm                      - Colour temperature : 4.500 °K                      - Colour rendering index (Ra) : 95                      - LED average life : 50.000 hours abt                      - Voltage : 100 - 240 V - 50/60 Hz                      - Low DC voltage version : 12 VDC                      - Power consumption : 12 W                      - Light head and arm weight : 1 kg                      - Light head diameter : 12 Cm                      - Painting White : RAL 9002                      - roley weight : 3 kg</p>	Acem	Starled 1R Evo	Italy
