**SURGICAL SUCTION
UNIT**

SURGICAL SUCTION UNIT

Üzümcü Novela Series surgical suction units are life support devices immediately evacuating the blood accumulated in the surgical areas and respiratory tract by creating vacuum at a certain flow rate, increasing surgical area visibility and providing continuous respiration.

NOVELA

NOVELA SENSEO

NOVELA EXTRACTOR

Models

- Novela with 2x3 L Plastic jar
- Novela Senseo with 2x3 L Plastic jar
- Novela Extractor with 2x5 L Plastic Jar

* Note Novela and Novela Senseo with 2x5 L Plastic jar by request

Disposable Jar

- Ease of installation and usage with optional disposable jar set

Fivefold Cannula Sets

Birth Cups

Optional Accesories

- Silicone Birth Cup, 50mm
- Silicone Birth Cup, 60mm
- Silicone Birth Cup, 70mm
- Cannula Set, 5 pcs

Detailed Specifications

< Unit & Control Panel Specifications

- Rapid suction with 60 L/Min flow rate, adjustable vacuum power at 680 mmHg interval and increased surgical area visibility
- Vacuum adjustments by easily accessible control panel and vacuum indicator for monitoring vacuum level
- Maintenance free, silent, non-vibrating, oil free vacuum pump

< Motor Protection System

- Protective technology preventing overflowing and liquid leakage to pump system by integrated buoy system and hydrophobic filter

< Jar Specifications

- Collecting jars with scaled body, integrated easy to carry handle, 3 and 5 liter capacity options, autoclavable glass & plastic and disposable options.

< Foot Switch Specifications (Only For Vacum Extractor)

- Designed to be used in delivery operations via Malmstrom-Throe method by its integrated pedal system. Device has optional delivery assistance equipment as birth cups and fivefold cannula sets.

< Full Automatic System

- Surgical suction option sensing the liuid level with sensors at the back of the jar. When the first jar is full, system switches to the second jar automatically. When both jars are filled, system automatically stops vacuuming. (Novela Senseo)

< Sterile Use

- Sterilizable probe bowl to keep the suction cannula in disinfectant solution until the moment of use

< Body Design

- Impact resistant and cleanable aluminium body design compatible with hospital disinfection procedures

< Ergonomic Design

- Ergonomic design providing ease of carrying and moving
- Easy transfer by four castors, two of them with brake

PORTABLE SUCTION UNITS

< PA-2

< PA-2S

- Designed to be used in small operations requiring low vacuum
- Portable design suitable for holding in hand
- Star base trolley with five castors (PA-2S)

Models Specification

- PA-2 Portable
- PA-2S Portable, with trolley

HAND HELD SUCTION UNIT HA-25

Üzümcü HA-25 hand held suction unit is a practical device suitable for mechanical use in case of emergency operations without any electrical connection.

Specification

- Max. Vacuum Power : 450 mmHg
- Collecting Jar Capacity : 250 ml
- Dimensions (WxLxH) : 280 x 195 x 65mm
- Weight : 346 gr
