

X-Ray Protection Equipment

X-Ray Protection Goggles

Model „Panorama“
Art. Nr. 424001

The wrap frame is constructed of extremely durable Acetate that exhibits superior flexibility while minimizing potential breakage. The molded wrap features provide maximum comfort with a full saddle bridge made of silicone and spring hinges. Weight is distributed evenly over the nose while providing excellent peripheral vision with leaded glass side shields.

Model „Ultra-light“
Art. Nr. 424106

Manufactured of lightweight Nylon, the Ultralight is designed to offer comfort and provide protection for the entire eye area without the need of an added side shield for lateral exposure. The curved front and temples with rubber tips assures a close secure fit.

Model „Fitover“
Art. Nr. 424107

Originally designed to fit over prescription eyewear, this oversized model is also an excellent choice for those requiring good splash protection. The large, clear side shields protect the user from lateral exposure while eliminating the “tunnel” effects of look-alikes.

Type	Artikelnr.	Material	Lead equivalent <i>in mm Pb (±0,05)</i>	Weight <i>in g</i>	Colour	Available prescription types
Panorama	424001	durable Acetate	0,75	86	brown	with and non prescription. Range from +4,0 to -7,0
